

One-stop shop for clinical trial ancillaries

As well as supplying Sterile medical devices and the Hemedis range of products ADAllen Pharma also act as a one-stop shop for all your clinical trial procurement needs for the following range of products:

- **Needles and syringes**
- **Vials**
- **Laboratory equipment**
- **Infusion sets and pumps**
- **Medical dressings**
- **Medical devices**

We have strong supply relationships with a number of manufacturers and work with them to shorten the lead time to the customer's trial time requirements.

Why do we recommend these products for clinical trials?

AMD manufacture quality medical devices optimally packaged for ease of quality control, their products meet the stringent requirements of clinical trials.

Hemedis products are specifically designed to simplify your process cycles, saving you time and reducing risk of contamination.

Work processes can often become strained due to poor quality equipment and consumables. We aim to alleviate these fears and allow you to focus on patient care and clinical outcomes through the provision of quality medical devices and ancillaries.

Contact us to discuss how we can help fulfil your specific requirements for your next clinical trial.

Medical Devices

ADAllen Pharma is an approved UK distributor of AMD Sterile Medical Devices and the Hemedis MIXI® Infusion and mixing bags, MIBMIX® Compounder and APAMIX® high-level compounding software.

As a procurement specialist for clinical trials, our team is trusted by clinical researchers around the world as a reliable and responsive partner providing confidential and rapid service that helps to improve the quality and delivery of their clinical trials.

Hemedis MIXI® Infusion bags & MIBMIX® Compounder

This diverse product range includes mixing and infusion bags, tubing systems for compounding and a variety of other useful accessories to simplify the pharmaceutical production process.

MIBMIX® Compounder

Using MIBMIX® compounders the filling, mixing or transfer of liquids become easy, quick and reliable processes. The combination of high quality equipment, along with its flexible and versatile application spectrum, intelligent features and easy-to-use APAMIX® software make the MIBMIX® compounder an essential tool in TPN preparation.

MIXI® Mixing Infusion Bags

Made of high quality EVA (ethylene vinyl acetate) material, the bags are available in sizes from 50ml to 5,000ml and equipped with 3 different access points to allow full compatibility with any compounder device.

MIB Multi-Chamber Bags

MIB multi-chamber bags are available as two or three chamber automated filling systems. Bag chambers are separated by two-piece pinch systems. The access ports of the bags can be equipped with different connectors providing compatibility with customers' existing systems.

MIB Tubing Sets

MIB Tubing Sets are designed for automated bag filling and can be customised depending on your individual needs. Equipped with colour-coded leads that allow easy organisation and reference and contains pressure valves to prevent unwanted mixing of fluids.

MIB Accessories

We offer a variety of accessories in order to support and enhance other products, to reduce contamination risk and to simplify the pharmaceutical production process.

Cryopreservation Products

Cryobags for storage in the gaseous phase of liquid nitrogen are available. For biotechnical purposes Hemedis offers a range of biotech big bags and necessary handling equipment which can be sourced through your project manager at ADAllen Pharma.

AMD Sterile Medical Devices & Ancillaries

AMD manufacture and provide aseptically optimised transfer sets and accessories. Items and combinations are available from individual unit cleanroom packaging (Alcohol and VHP impermeable) right through to packs large enough to support bulk manufacture. Packaging is available in crevice free PeroxyClear and PeroxyMet - making pre-use QC of the contents rapid and accurate.

Pouches are qualified and validated for gamma sterilisation and impermeability to Alcohols and VHP, yet are soft, flexible and easy-linear-tear. Being CE marked and highly validated places these products in a league of their own in terms of GMP compliance.

Syringes & Closure Devices

- AMD Sterile Transfer Sets & Accessories
- AMD Luer Lock Combi Stopper
- Customised Procedure Packs
- Needle & Filter Devices
- Needles for Syringe Filling
- Filter Needles
- Vial Access Devices

AMD Sterile Compounding Procedure Packs – Vial Access Devices

- Vial Access – Non-Vented
- Cleanroom Cleaning
- Mopping Systems
- Sterile Alcohols & Wipes
- Sterile GMP Transfer Disinfectants & Rapid Sporicides
- Pouches, Sealers & Consumables

Shawseal TS2 Touchscreen Pneumatic Pouch Sealer

- Sterile Purple & Yellow Clinical Chemo Waste Bins
- Sterile Yellow Clinical Waste Bins
- Cleanroom Compatible Pens
- ISO 5 Cleanroom Chemo Preparation Mat
